

Why Exhibit at This Pavilion?

- Direct Access to Buyers Across Automotive, Packaging, Electronics, Healthcare and Construction
- Position Your Company as a Preferred Raw Material Partner in India's Growth Story
- Launch New Products, Educate The Market and Meet OEMs Face-to-face
- Showcase Your Contribution to Circularity and EGS Compliance
- Engage with Key Stakeholders Through B2B Meetings, Panel Discussions and Workshops

Pavilion objectives

- Promote Local Sourcing of Engineering and Speciality Plastics
- Highlights India's Progress in Sustainable Materials and Recycling
- Enable Connections Between Raw Material Innovators and Processors
- Enable B2B Partnership Between Manufacturers and Users
- Showcase Sustainable and Recycled Materials for a Greener Plastics Economy
- Drive Conversation on Design-for-Recyclability, Circular Economy and Advanced Compounding
- Position Tamil Nadu and India as Global Players in Raw Material Solutions
- Educates Stakeholders on New Grades, Formulations and Complaints

Call to Action

- Plastics, Raw Materials, Polymers, Resin Manufacturers, Additive Manufacturers have a Pivotal Role in Reshaping India's Self-Reliance in Manufacturing. Join IMTOF 2026 and IPPEX 2026 to :
- Gain New Clients Across Sectors.
- Reduce Dependency on Imports by Showcasing Indigenous Capability.
- Explore Export Channels and Strategic Alliances.
- Shape The Future of Precision Engineering in India.
- Booking Now Ensures Premium Location, Marketing Benefits and Early-bird Incentives.
- Let us Celebrate and Elevate The Tooling Excellence of Tamil Nadu at The Global Stage!
- MSME Subsidy Supported by Government Guidelines

Overview

India's Plastics and Rubber Processing Industries are Experiencing Rapid Transformation and Raw Material Innovation is at Its Core. At IPPEX 2026, A Dedicated Pavilion will Bring Together Resin Manufacturers, Compounders, Distributors, Recyclers and Additives Provider Under One Roof.

This Pavilion is Designed to Showcase The Entire Material Ecosystem Powering The Plastics and Rubber Industries — from Virgin Polymers To Sustainable Alternatives.

Key Focus Areas

Basic Polymers & Resins

Commodity Plastics

- PE (LDPE, LLDPE, HDPE), PP, PS, PVC
- Large-Volume Grades for Packaging, Household and FMCG
- Indigenous Production and Import Substitution

Engineering Thermoplastics

- PA (Nylon), PC, PBT, POM, ABS, SAN
- High-Performance Plastics for Automotive, Electricals, Electronics

Speciality Plastics

- PPS, PSU, PEI, LCP, PVDF, High-Temperature, Chemical-Resistant and Flame-Retardant Polymers used in Aerospace, Medical, Defence and EV Battery Components

Thermosets

- Epoxy, phenolic, unsaturated Polyester (UP), Melamine, PU Resins for Composites, Electrical Insulation, Adhesives and Laminates

Rubber & Elastomers

- Natural Rubber (NR), SBR, NBR, EPDM, CR
- Thermoplastic Elastomers (TPE, TPV, TPU)
- Compounded Rubber for Tyres, Seals, Automotive parts
- Rubber Recyclers and Reclaim Suppliers

Master batches, Additives & Modifiers

- Color Masterbatches (Standard / Custom)
- White, Black and Functional Master batches
- UV Stabilizers, Slip Agents, Antioxidants, Anti-Fogging Agents
- Flame Retardants, Anti-Static, Anti-Microbial Additives
- Processing Aids and Compatibilisers for Recyclates

Compounds & Polymer Blends

- Filled & Reinforced Compounds Flame-Retardant, Conductive, Anti-Static Grades
- Custom-Engineered Blends
- Customised Reinforced Compounds
- FR, UV, Conductive and High-Heat Applications
- Alloys and Modified Polymers for Auto / EV Sectors

Reprocessed Plastics & Circular Economy

- Post Consumer and Post-industrial Recycled PE, PP, PET, PVC
- High-Quality Granules, Flakes, Compounds
- Closed-Loop Systems for FMCG and Auto Industries
- Recyclers and Reprocessors Showcasing Sustainable Solutions
- Biodegradable and Compostable Alternatives
- Industry-Led Sustainability Programs Aligned with ESG Goals

Tamil Nadu – A Strategic Location

- Automotive and EV Capital of India – Hyundai, Renault-Nissan, BMW, Daimler, Ashok Leyland, Tata Motors, Jaguar Land Rover, VinFast, TVS Motor, Royal Enfield, Ather Energy, Ola Electric, Simple Energy, etc.,
- Strong Demand for Engineering Plastics, Elastomers, and Rubber Compounds
- Rapid Growth in Packaging, Medical Devices and Electrical Sectors
- Emerging Polymer Recycling Clusters in Chennai, Coimbatore and Hosur
- Government Incentives for Sustainable Materials, Polymers R&D and Recycling Units under Atmanirbhar Bharat & PLI Schemes

Who Should Participate?

Exhibitors

- Resin and Polymer Manufacturers
- Compounders and Masterbatch Makers
- Rubber and Elastomer Processors
- Additive and Specialty Chemical Companies
- Plastic and Rubber Recyclers
- Stocklist and Polymer Warehouse
- Sustainable Materials Innovators
- Bioplastics and Green Polymer Developers

Buyers / Sellers / Visitors

- Plastic Processors & Converters
- OEMs in Tier 1 and Tier 2 Suppliers
- Automotive, Packaging, Electrical, Agri, Healthcare
- Distributors, Stockists, Procurement Officers
- Innovation Startups, Academia and R&D Labs

Conference Delegates

- Materials Scientists, Chemists, ESG Heads, Sustainability Consultants, Policymakers and Recyclers, Global Buyers Looking for Indian Sourcing
